iTRAIN, INC. TO CREATE TRAINING PROGRAM FOR WEBEX SOFTWARE

*Innovative On-line Training Company Produces Training Course while
Using WebEx for Internet Computer Classes.*

June 8, 1999 - Austin, Texas - iTrain, Inc. is pleased to announce that they have received a contract to write and produce training classes for Active Touch's WebEx software. This is the same software that iTrain, Inc. uses in its innovative new computer training service.

The iTrain service uses Active Touch's WebEx software to facilitate online training through desktop sharing. Never before has software instruction been so easy! All the iTrain user needs to do is log onto the service, and they will receive personalized, real-time answers to specific questions regarding a broad range of software applications.

Active Touch also intends to spotlight iTrain, Inc. on its website as an ingenious way to use the WebEx software. This software allows real-time communication with only a phone and standard browser - no need to download or purchase additional materials. This software enables the novice computer user to access the iTrain service quickly, easily and as needed.

iTrain, Inc. is proud to offer pre-paid and pay-as-you-learn programs. Instruction takes place in the privacy of the home or office, at a time convenient for the user and concerning topics the client wants to cover. Save time and energy by learning what you need, when you need it!

About iTrain

iTrain, Inc., based in Austin, Texas, has redefined development and delivery of customized training via the Internet. Focused on providing a value-added resource for its clients, iTrain has pioneered a methodology that overcomes the time and resources needed to effectively train and support students. iTrain creates customized training courses for a wide range of industries, from high-tech to high-touch. For more information, call 512-374-1008 or visit the company's website at www.itraininc.com.
